"Plan to make America Beautiful"

1910 **UNADILLA NURSERY FARMS** 1957
750 Riverside Drive
JOHNSON CITY, NEW YORK
Dial 7-5752

A tree in the home at Christmas has become a part of our holiday festivities. The demand for trees has created a new business enterprise, Christmas tree farming. Estimated Christmas trees cut in the 1956 season is over 37 million trees. In some sections of the country they had to use trellises, home-made trees with decorations. The native tree supply is dwindling. Nature does not plant and grow trees fast enough to meet the demand; man must lend a hand. Many old farms that cannot grow a profitable crop of hay and grain can be made into paying Christmas tree plantations.

We have a friend in Pennsylvania that has planted over 2000 acres of Scotch Pine; friends in Canada who have paid good prices for farm land for tree planting. We have some first-hand information on the cutting of nine-year-old pines that were full Christmas tree size. Another friend took in \$1,250 for 1000 nine-year-old stumps. Also, a school teacher who got \$500 for a hillside of White Spruce. He also has 20,000 White Spruce planted that will soon be a full-time job marketing. A few years ago Christmas tree planting was only an idea; today it is the real thing.
